

## Para Roll Label – Production and Faults Information

Each roll of fabric produced by Para has a label at each end that shows all the information about it. It is applied immediately after the final quality checks, prior to wrapping in a sealed in strong plastic film.

According to commercial norms, 1 tagged fault is allowed per 10 metres, so 4 tagged faults are allowed per roll. Generally, a fault allowance is 20cm. The total allowances (Bonifico) are subtracted from the gross metrage (Metri Lordi) to calculate the nett metrage (Metri netti) which is the amount that appears on the invoice. Two cuts are allowed per roll, with the same allowance.
